Taking Measurements for the ENELL Fit

We want your ENELL Bra to fit perfectly, so rather than referring to your current bra size it's important to take new measurements.

1. While wearing your everyday bra, measure around the fullest part of your bust (bust measurement).
2. Measure around the rib cage directly under the breasts (rib measurement).
3. Please refer to the ENELL size chart to see which ENELL size is best for you.

Trying on the ENELL Bra and Checking the Fit

- **The ENELL feel:** When you try on an ENELL Bra for the first time, be ready for the difference. It may seem too small at first, but a snug fit means superior support and comfort.
- **Putting on the ENELL:** It's important to begin to hook from the bottom and go up, adjusting your breasts as you go. Once your ENELL is fastened, the breasts should be held firmly in the upper center portion of the bra.
- **To ensure proper fit:** Twist your body as if you're doing a waist exercise – proper fit means the bra should stay in place.
